PROFILE

Enthusiastic and results-driven Full-Stack Developer specializing in backend systems and API development with ASP.NET Core MVC and C#. Experienced in architecting and implementing secure, scalable RESTful APIs and enterprise-grade backend solutions. Skilled in data management and optimization using SQL, and knowledgeable in authentication, role-based security, and integration of third-party services. Adept at designing robust application architectures that ensure reliability and performance. Proven ability to deliver complex backend projects that power dynamic web applications, with additional experience in modern UI frameworks (React.js, Redux, Tailwind CSS) and dashboard development using Power BI. Quick learner committed to continuous improvement, problem-solving, and building impactful technology solutions.

TECHNICAL SKILLS

- **Frontend Development:** React.js, Redux, Context API, Tailwind CSS, Axios, HTML, CSS, JavaScript
- **Backend Development:** ASP.NET, .NET, ASP.NET Core MVC, Appwrite ,**expressJs** ,**Node.js** ,**mongoose**
- **Programming Languages:** C#, Python, Java, JavaScript
- **Databases:** SQL Server, MySQL, DBMS ,MongoDb
- **Tools & DevOps:** Git, GitHub, Linux, CI/CD, Vercel
- **Others:** Power BI, Visual Studio

EDUCATION

Bachelor of Computer Applications (BCA)

YCMOU University | July 2021 – July 2024

- Relevant Coursework: Operating Systems, Data Structures, Algorithms, Networking, Databases, Web Technology
- **CGPA:** 7.2 / 10

PROJECTS

Ecommerce Website App

July-2025 | React, Vite, Axios, React Context, Reducer, Tailwind CSS, React Router, React Icons, ESLint

- Modern ecommerce platform with product browsing, filtering, and detailed views
- Add-to-cart and wishlist functionality with efficient state management using React Context + Reducers
- User authentication (login/register) integrated with API layer via Axios
- Organized API operations for product data and user authentication in a dedicated service layer
- Responsive, mobile-friendly UI styled with Tailwind CSS and utility classes
- Client-side routing with React Router for seamless navigation
- Reusable components and linting (ESLint) for code quality and maintainability

MegaBlog – Full-Stack Blogging Platform

Aug-2025 | React, Redux Toolkit, Appwrite, Tailwind CSS, React Router, TinyMCE, React Hook Form, Vite

- Full authentication and CRUD operations implemented via **Appwrite backend**
- Rich text editor using **TinyMCE** with image upload support for blog posts
- State management powered by **Redux Toolkit** for scalability and maintainability
- Form handling with **React Hook Form** for validation and smooth user experience
- Responsive, mobile-friendly UI styled with **Tailwind CSS**
- Client-side navigation with **React Router** for seamless routing
- Efficient and organized codebase built with **Vite** for fast development and optimized builds

Youtube-Clone-Backend

October 2025 | JavaScript, Node.js, Express, MongoDB, Mongoose

- Developed a scalable video-sharing backend platform enabling users to upload, manage, and stream multimedia content.
 - Implemented robust user authentication and authorization with role-based access controls for admin and regular users.
 - Designed RESTful APIs to facilitate seamless interaction between the backend and various client applications.
 - Enabled real-time user features such as comment systems, likes, and subscriptions for enhanced interactivity.
-

EXTRA-CURRICULAR ACTIVITIES

▣ Private Tutor (Current)

Teaching Mathematics to 11th and 12th grade Commerce students, simplifying complex concepts and helping students achieve academic excellence.
